

# CORPORATE FACT SHEET

**INFOVISION**  
GLOBAL IT SERVICES AND SOLUTIONS COMPANY

From a modest beginning 20 years ago, by technology professionals with a vision to provide quality and cost effective IT solutions worldwide; InfoVision is today, a global IT Services and Solutions company that covers the full range of needs for enterprises, from Consulting Services to Solutions. With a primary focus on Strategic Resources, Enterprise Applications & Technology Solutions, InfoVision's core practice areas include **Mobility Solutions, Business Intelligence,**

**Big Data Analytics, Visualization and Collaboration, and Wireless and IP Communication.**

InfoVision has gained a reputation and demonstrated the ability to meet highly sophisticated technology needs and maintained resources for big and small clients across the telecom, finance / banking, retail, pharmaceutical, energy / utilities, transportation, healthcare, insurance, manufacturing and other industries.

**INFOVISION FUNCTIONS CENTERS AMONG  
DALLAS, BOSTON, TAMPA,  
MOUNTAIN VIEW AND BENGALURU.**

## CLIENTELE

Having executed complex and volume projects on time and within budget; InfoVision's clientele includes Fortune 1000 clients all over USA, from various verticals.

➤ InfoVision supported a global Food Service retailer with more than 20,000 local restaurants serving over 30 million people in more than 100 countries each day (One of the world's most well-known and valuable brands with over \$10 Billion in annual revenue) in making pre-emptive decisions from

the petabytes of data collected from 1000 restaurants in 10 countries regarding business practices, client experiences, food menu, hygiene parameters, employees and other related issues.

➤ InfoVision has the competence of establishing benchmark practices, utilizing its expertise in Big Data Analytics for Supply Chain and Customer Relations for a Fortune 500 Company (A leader in document technology and services. With an employee strength of 140, 000+, a global reach of 180+ countries, \$ 21+ Billion in Revenue) to gain 80% market share, delivering spare parts and services at very high levels of fulfillment, to ensure that engineers and customers obtain

spares and consumables the moment required on the same day, with the benefit of no excess stocks and minimal inventory carrying cost. The competence, enabled the company to improve revenues up to 2x, reducing operational costs up to 30% by improved Demand Forecast, Automated Sourcing, and Distribution through predictive analytics.

- InfoVision helped a client develop the concept of a Service Oriented Architecture (SOA), one that seamlessly integrates over 200 critical customer-service life-cycle services covering Ordering, Provisioning, Service Provisioning, Service Management, and Billing.
- InfoVision enhanced the customer service capabilities of one of the largest automobile makers in the world by seamlessly integrating the different Product Life-cycle Management (PLM) systems involved in management of various parts inventory data and

determination of a required part, and the Enterprise Resources Planning (ERP) systems - that manage relationships with various original and after-market parts manufacturers.

- InfoVision assisted one of the world's leading providers of Computer Reservation Systems for the airline industry in improving various management reporting capabilities of the reservation system.
- Working with the senior IT team, InfoVision's Specialized IT Solutions Group developed a Business Operations model and a SAS Operations model to achieve order-of-magnitude improvements in the ability to rapidly aggregate and redeploy inventory in response to anticipated demand for one of the world's leading providers of in-home movie and game entertainment with more than \$5 billion in annual worldwide revenues and more than 8,500

stores throughout the Americas, Europe, Asia, and Australia.

- InfoVision assisted one of the largest financial institutions in the world with operations in over 100 countries, automate the entire process of bankruptcy, in record time.
- Using Data extraction, Data mining, and Business Intelligence technologies the InfoVision team enhanced the overall effectiveness of the decision-process for a Fortune 500 company - which is a global diversified financial services provider offering a broad array of credit, savings, and loan products to customers in North America and Europe.

- InfoVision assisted a NYSE company, one of the industry leaders in Discovery and manufacturing of ophthalmic pharmaceutical, surgical, and vision care products to successfully deploy and expand the IT processes and capabilities related to Phase II and Phase III trials of a new drug for Glaucoma or ocular hypertension.
- InfoVision leveraged (a) its understanding of FDA clinical trial process, its experience in data acquisition, analysis process development, data organization and biometric analysis, and (b) its expertise in advanced analytical platforms such as SAS to help a privately held pharmaceutical company successfully complete several post-marketing studies in several categories of target populations as part of phase IV.
- Utilizing a specialized Visual Collaboration Software, VCollab - InfoVision made it possible for engineers of a global technology leader and supplier to the railroad, transit, marine and mining industries with several billion dollars in sales; to navigate complex 3D images, reducing task completion time from 2 hours to few minutes by breaking it into smaller segments and being able to perform this work on Personal Computers instead of high end graphics workstations.

## ACCOLADES

- 2002 - Inc. 500
- 2004, 2005 - MBN 100
- 2004, 2005 - Texas Crescent Fast 50
- 2001, 2004, 2005 - Dallas Top 100
